

### ABIDE WITH ME.

On the shell torn soil of No Man's land a dying soldier lay, "I fear no foe" he whispered again, "With thee at hand to bless." His body racked and rent with pain; each breath was an agony. He had watched the setting sun go down, far in the golden West, And now, on the silent battle line, the whole world seemed at rest. And, lying on that blood soaked ground he thought of the hymn he'd sung. In the dear old parish church at home in the days when he was young. And there, in that deadly solitude, with no one by his side, "Abide with me," he whispered low, "Fast falls the eventide."

MASONIC BUILDING  
Hardinsburg, Ky.

And the answer came, as it always does, to those who simply trust. He no longer feared the coming of the lovers of blood and lust, He had given his life for others, none had he tried to oppress. But what of his life's ambition, before hearing liberty's cry: Of wealth and ease for his loved ones, to be looked for by and by? That dream had now departed, for he was passing away. Again he murmured "Swift to its close ebbs out life little day." But the light failed and darkness reigned over both land and sky, Ere his comrades learned that in No Man's land a friend was left to die. They found him at last, but only in time to hear his concluding plea, As he breathed the words, "In life, in death, Oh, Lord, abide with me."

The above was written and contributed to The Breckenridge News by, Mr. Herbert V. Harris, 202 Commercial Building, Louisville, and who for many years resided in Cloverport.

Tom Stark and M. B. Lowman have joined their organizations and are conducting a General Advertising Agency under the firm name of—

### STARK-LOWMAN CO.

Mr. Stark is President of the Company, Mr. Lowman is Vice President and General Manager and M. K. Stark is Secretary and Treasurer.

Their Offices are all in  
Suite 517-520  
Crutcher-Starks Building

## ACKNOWLEDGMENT IS MADE OF VALUABLE ASSISTANCE GIVEN BY MOTION PICTURES

### SPLENDID RESULTS OF GOVERNMENT INCUBATOR.

(Prepared by the United States Department of Agriculture.)

In the annual report of the secretary of agriculture acknowledgment is made of the co-operation and valuable assistance given to the government by the motion-picture industry in placing information and appeals of emergency character concerning food production and conservation and other vitally important subjects before patrons of motion-picture theaters. The secretary also refers to the systematic development of the film work of the department under last year's appropriation, which carried the first definite allotment made for motion pictures in the department of agriculture.

"The dissemination of information by means of motion pictures," says the secretary, "which hitherto has been conducted only on an experimental basis was, by action of congress, given a definite allotment of

funds, which enabled the department to undertake the systematic development of this activity. Films prepared in the department's laboratory were used effectively in connection with its efforts to recruit farm labor, encourage the preservation of perishable fruits and vegetables, prevent forest fires and stimulate agricultural production. They were shown, through the extension service, to approximately 500,000 people at demonstration meetings, county and state fairs, schools, churches and municipal gatherings, and, by arrangement with one of the commercial companies, to about 4,000 people at motion-picture theaters. The film companies actively co-operated with the department and rendered valuable assistance by placing information and appeals of an emergency character before the patrons of the theaters served by them."

## FORD'S NEW CAR TO CREATE JOBS

For 200,000 Employees. Declares Present Stock is Not For Sale And Will Not Buy Others.

Detroit, March 11.—"We are going to give the people something new in the way of an automobile," said Henry Ford this morning. "Not only will it be a finished product within the reach of every family, but will give them as well the last word in a motor car—all for \$250 or \$300."

Mr. Ford repeated his assertion that he was forced into building a new car by the decision of the courts, which compels the distribution of more than \$19,000,000.

"This isn't spite work," he asserted. "The minority stockholders forced me to do it when the courts upheld their demands for increased dividends of the Ford dividends. Many millions of dollars came to me with that decision. I could not give or throw that money away so I decided to build a new type of automobile."

"In the ordinary course of events I would have changed the type of car in the old Ford plant. If left alone I should have gone ahead, for the demand of the automobile business would make a change necessary. I simply decided to anticipate that demand."

### Reassures Old Employees.

Mr. Ford was anxious that none of the employees of the Ford Motor Company feel that their future was jeopardized by his new venture.

"I don't want them to worry in the slightest degree," he said, "They will be taken care of."

"The present plant employees number about 50,000 while our new company will eventually offer employment to four or five times that number."

"The court decision is one of the best things that could have happened. It will mean much good for the people, for our new undertaking will mean more work. The recent court ruling which apparently is wrong, will result in the public getting a better

car, a cheaper car and one more fully upto date than those now on the market.

### Sees Big Demand.

"I am positive there will be a great and immediate demand for such cars as we will build, because they will embody everything necessary to a real family automobile. We will give them all of the improvements and refinements that have been developed in recent motor car manufacture. Our plants will start next year and it is our plan to locate as many as possible on water power sites."

"The company is an entirely separate and new undertaking. We will in no way interfere with the present Ford Motor Company. The present plant at Highland Park will remain where it is and will keep on doing business. None of our stock is for sale and we save 58 1/2 per cent of the capital stock. Furthermore, we are not in the market for a share owned by the other stockholders."

Edsel Ford said he did not see how the minority stockholders of the Ford Motor Company could prevent himself and his father from following out their plans to build a new car, as has been stated would be the course of the minority interests.

"That is a matter for the lawyers to decide," Mr. Ford stated.—New York Sun.

### As the Gang Saw Them.

Three little boys were calling each other by the names of "Red," "Squinch" and "Bones." When asked why they did so, Squinch spoke for them. "It's our names what matches our looks best to the gang."

### GOOD QUALITIES OF SHEEP

They Compare Favorably With Other Animals in Economy of Production—Keep Weeds Down.

Sheep can be made profitable on high-priced land. It is said, as British experience shows, they compare favorably with other animals in economy of production. They require a minimum of expensive concentrated feeds. They exceed the larger animals in the rate of maturity; lambs can be made ready for market at from four to six months. They make possible the economical and fuller use of labor. They are of assistance in keeping the farms free from weeds. The sheep farm is usually a weedless farm.

## OLD AGE STARTS WITH YOUR KIDNEYS

Science says that old age begins with weakened kidneys and digestive organs. This being true, it is easy to believe that by keeping the kidneys and digestive organs cleansed and in proper working order old age can be deferred and life prolonged far beyond that enjoyed by the average person.

For over 200 years GOLD MEDAL Haarlem Oil has been relieving the weakness and disability due to advancing years. It is a standard old-time home remedy and needs no introduction. GOLD MEDAL Haarlem Oil is inclosed in odorless, tasteless capsules containing about 5 drops each. Take them as you would a pill, with a small

swallow of water. The oil stimulates the kidney action and enables the organs to throw off the poisons which cause premature old age. New life and strength increase as you continue the treatment. When completely restored continue taking a capsule or two each day. GOLD MEDAL Haarlem Oil Capsules will keep you in health and vigor and prevent a return of the disease. Do not wait until old age or disease have settled down for good. Go to your druggist and get a box of GOLD MEDAL Haarlem Oil Capsules. Money refunded if they do not help you. Three sizes. But remember to ask for the original imported GOLD MEDAL brand, in sealed packages.

### REDUCING COST IN FEEDING

Farm By-Products Can Be Used More Extensively to Reduce Cost of Cattle Rations.

(Prepared by the United States Department of Agriculture.)

That it is possible to feed beef cows in the corn belt more economically during the winter is shown by a report of United States department of agriculture investigators who made a study of winter feeding costs on five representative farms in that section. This reduction in the cost of feeding is possible without detriment to the cows or calves through larger use of farm by-products in the rations.

Avoid feeding excessively, avoid costly rations, use more cheap roughages, such as straw and corn stover, feed silage where conditions make it more economical than corn fodder.

The first farm used as an example is in east central Iowa. The breeding herd consisted of a grade bull and 22 grade cows, from which 20 calves were obtained. The cows were given excessive amounts of high-priced feed for both of the years for which records were procured, says the bulletin.

They were turned on stalks November 15. Winter feeding began a few days later and lasted until May 1, when the cows were again turned on pasture. During the 165-day interval each cow received the following:

Stalks.....1 1/2 acres at \$1 an acre.  
Fodder.....2-5 acre, at \$5 an acre.  
Mixed hay.....1/4 ton, at \$10 a ton.  
Corn.....2 bus. at \$0.65 a bu.

As the average yield of corn on this farm was 50 bushels to the acre, and as the best corn was cut for fodder, the cows, considering the corn in the fodder and the additional grain fed, received a total of 22 bushels per head. This is almost a fattening ration. If the corn had been husked from the fodder and only the stover fed, there would have been sufficient roughage for the cows. Estimating that three-fourths of a ton of stover was eaten per acre of stalks and that the stover from the fodder fed would go two tons to the acre, and allowing the cows three bushels of corn each during the winter instead of 22, they would receive the following daily ration:

Stover.....20.6 pounds  
Mixed hay.....9.0 pounds  
Corn.....1.0 pound

This ration would be sufficient for their needs.

By merely eliminating the excessive amount of corn (19 bushels) from the ration a saving of \$11.40 could have been made and the feed bill reduced very nearly one-half, or from \$24 to \$12.60 per cow.

Rations on the fifth farm inspected by the investigators are pronounced very satisfactory. This farm (240 acres) is in northeastern Kansas. Seventy acres were in corn, 25 in oats, 25 in wheat, and 100 in pasture. Because of the unusual rainy weather

Beef Cattle on Pasture.

prevailing in that section the oats and wheat for the year in which the record was taken were practically destroyed and the straw was absolutely worthless for feeding. To provide for a lack of hay 15 acres of millet and four of sorghum were grown.

The herd consisted of a bull and 15 grade cows, from which 15 calves were obtained. The cows were turned on stalks November 1 and allowed to run there until spring. They received approximately three acres of stalks, one ton of millet hay, and one-third of a ton of sorghum fodder each. Valuing the millet at \$4.50 a ton and the sorghum at \$4 a ton, the winter feed cost per cow was \$8.20. The cows were carried through the entire year for a net cost of \$25.85.

### INFORMATION WANTED

They say Death loves a shining mark— If so, I wonder why The birdheads near the orchestra Are not the first to die?

## NECKLACE IS HUGE

Ornament Is Brought Back as a Pronounced Fashion.

Strings of Pearls Allowed to Hang Full Length Instead of Being Wrapped Around Neck.

The French designers have brought back into fashion huge necklaces from an ornamental past. They are not made of jewels, yet they are costly, and the supply of fine ones rapidly diminishes. Once upon a time our Indians bartered peltries for bright beads. Such was the foundation of some of our great American fortunes.

Today, declares a fashion writer, there are women who vehemently declare that they would rather their second year fur pieces for a gay necklace. They sell old clothes in order to get one of these much desired possessions.

It is the hour of the necklace. All that has gone before is as nothing to what now exists. And, mind you, the necklace is not of precious stones. There are few well dressed women who wear any precious stones about the neck except pearls. Diamonds hold a place with some, but they are not considered among well dressed women, as an ornament of parts. Costly they are, it is true, and in unique settings of carved platinum they have their place, but the bare, bald, crude diamond necklace is a bit blatant for the fastidious woman. She prefers pearls, and so it seems does every other woman who can buy a string, from six dollars up.

If the attention of the latter class is turned toward the barbaric necklaces, it may be that they will quickly fall into disuse; but one thing is certain, which is that six dollars will go a short way toward purchasing one of the rare necklaces of the hour.

An individual designer of clothes in New York found himself the fortunate possessor of a half dozen necklaces which he had seen in an antique shop, where they were thrown over a string in the back of the store. He immediately purchased them. Then, the French fashion found its way across the ocean into America, and the designer attached his necklaces to costly gowns, either at the neck or at the waistline, and they added to the price he asked for the garment.

There is nothing fastidious or delicate about the new chains; they are as heavy in appearance as medieval armor. They are made of great rings or long, oblong links, and the plaque or medallion in which they end looks like a Japanese crest. It is as full of color and as massive as the Egyptian jewelry of other centuries.

All of these new chains are short. The big, carved medallion rests on the bust. They do not reach to the waist, which is the desire of the precious tones. The woman who owns a marvelous string of pearls now lets it hang to its full length, you know, instead of wrapping it around her neck several times, in royal fashion.

### DRESS SUGGESTIONS

A red organdie underslip may be worn under a pale pink dress of the same material.

A blouse of cream-cotted net is charming when trimmed with platinum gray ribbon.

A dress of brown silk jersey may be collared but not cuffed with pale rose organdie.

White silk braid and black jet beads make charming trimming for a simple crepe de chine.

Evening cloaks and elaborate evening gowns are made with the new dropped shoulder line.

In the evening one may wear a hat of white clipped beaver, banded with white grosgrain ribbon.

An afternoon dress of gray and red-brown marquisette, trimmed in red-brown satin and crisp white organdie, is tightly draped and pulled around the ankles to fulfill the effect of tapering.

### PLAN FOR MARKETING EGGS

Infertile Product Will Withstand Conditions Much Better Than Fertile—Ship Often.

(Prepared by the United States Department of Agriculture.)

Market white-shelled and brown-shelled eggs in separate packages.

When selling eggs to the country merchant or cash buyer insist that the transaction be on the quality basis.

Ship or deliver eggs at least twice or three times weekly.

Small or dirty eggs should be used at home.

When taking eggs to market they should be protected from the sun's rays.

Infertile eggs will withstand marketing conditions much better than fertile eggs.

### METHODS FOR FEEDING CORN

Hens Get Considerable Exercise When Fed on Cob—Supply in Dry Litter Satisfactory.

Hens can be fed corn on cob and will secure considerable exercise in picking it off, but the cobs should be picked out frequently. Feeding shelled corn in a deep, dry litter is also a satisfactory way.

## Farming Implements

We have a nice stock of Farming Implements, including Disc Cultivators, Sulky Plows, Corn Planters, one and two-horse Farm Wagons, Fertilizer and Field Seeds.

Write us for our prices on anything you may need.

### FORDSVILLE PLANING MILL COMPANY

JAKE WILSON, Manager

FORDSVILLE, KENTUCKY.

## FARMS FOR SALE

THEY ARE ALL BARGAINS  
PICK THEM OUT

No. 1 77 A. of fine river bottom land located in Tobins Bottom, Ind., 1 1/2 mi. from landing across the river from Cloverport, Ky., 135 A. hill land 3/4 mile back of the 77 A. tract. These two farms will be sold together for \$8,000, one half cash, balance in three annual payments. Description of the 77 A. tract is as follows: 65 A. of fine level bottom, about 12 A. running up on the approach of the hill where the improvements are, which consist of a four room cottage, small barn, one spring, two cisterns and one well and some wire fencing. 12 A. are in wheat and 20 A. in timothy and alfalfa.

Description of the 135 A. tract is as follows: About 100 A. rolling balance rough with 40 A. of the rough land in woods pasture; lots of good timber and 40 A. in grass for pasture. It is most all fenced with slat and wire. Large, good 7 room 2 story house, cellar under the house, a cetylene light plant installed in the house, and all kinds of out buildings, large stock barn, good crib, 12 A. of apple orchard with large cellar and cellar house in the center of orchard for storing fruit and vegetables, a cistern, 2 springs and 1 well for water with a good wind mill at the well, 10 A. of locust grove.

If these farms are sold before April 1st possession can be had at once. The owner also has much fine stock which he will sell if the land is sold.

No. 2. 180 A. good land 1/4 mile from Hardinsburg, Ky. which is the county seat of Breckinridge county, 125 A. level land, balance rolling, all cleared but 20 A. which has some good timber on it. 25 A. are in wheat, farm all under good fence with some cross fencing. There is a good 7 room bungalow in good condition which fronts the pike as you enter Hardinsburg good stock barn, good tobacco barn and two good tenant houses, 2 cisterns, 1 spring and a pond for water. Price \$13,000.00, one half cash, balance in three annual payments.
